Hi Cindy -

Rich and I have review the revised documents and are generally good with the changes. With your revisions, the document reads better.

Rich did have a few suggested changes - which I tried to include in the revised documents attached below. Also - I made a few more additions to try to address some of Terry Smith's comments. Also - noted that we did not hand out the "Understanding Your Lab Results" document - tried to revise the tech memo to reflect that we simply used the UJ definition from that document.

I know its difficult to try to track all the changes in the various versions. I will give you a call to discuss. Also - per this morning's conf call - once the changes are accepted - we need to send a clean version up the chain for review. I also need to revisit the SERAS contractor's memo - I think that your group had recommended some changes to that document earlier. We will need an updated document from the contractor.

Thanks again - Please take a look at the latest drafts. I'll give you a call to discuss.

- Kelley

Subject: Suggested Revisions to Tech Summary and Exec Summary

Kelley,

I sent out a version of the Tech Summary on Friday but the one in this email has the suggested revisions for the DV Issues section. Overall the document is redone to remove specifics about which lab and which contract.

In this email I have also attached a suggested revision to the Exec Summary to be consistent with the Tech Summary and removed the term errors since that term is not correct.

Let me know if the approach to these work and I'll go through one last time for grammatical edits.

Cindy
